

THE PERFECT BLEND
YOUR PRODUCTS, OUR SUPPORT

TRUSTiCERT[®]
SCIENCE • COMPLIANCE • INNOVATION

A ONE-STOP CONSULTANT FOR EVERY REGULATORY ASPECT

EU States controls are focusing on packaging and Safety Data Sheets.
Manufacturer and Importer are responsible for
packaging compliance
of products with TPD-II, CLP, REACH and national laws.

**Trust our qualified skills and our intelligence network
to dedicate yourself to the growth of your business,
forgetting about the regulatory aspects.**

YOU CAN COUNT ON TRUSTiCERT BECAUSE ...

We are **not involved in any productive partnership**:
only your products count and we protect your industrial secrets
through legal and IT support.

We are **professional** in the regulatory affairs, providing you
comprehensive assistance for EU and US.
Thanks to direct contacts with authorities, deals with flavour companies
and certified institutes, we **support your compliance at 360°**.

We are **passionate about guiding vaping professional** through
regulatory and technological challenges, supporting the diffusion of
innovative devices with a low impact on health.

TRUSTiCERT: an active player in certification

Do you know that TPD-II today does not certify your products?
But tomorrow it may allow or ask you to certify testing procedures.

How do we support this transition?

1 TRUSTiCERT scientists have been working with research centers for more than 4 years to set up innovative testing methods;

2 As a committed UNI member, TRUSTiCERT is proposing the results of its researches at the Technical Committees at:
National level (UNI / CT042 / GL67)
European level (CEN / TC 437)
World level (ISO / TC 126 - SC3);

3 Our quality specialists are setting up laboratory testings according to AFNOR and CEN incoming standards in order to certify the compliance of your products.
