

TRUSTiCERT is an innovative SME acting globally

as regulatory and scientific partner in the development of vaping sector.

“We blend Science, Compliance and Innovation to support health through the diffusion of new technologies.”

SCIENCE

Scientific expertise is the tool behind TRUSTiCERT's commitment to guiding its customers towards the development of safe products.

“5 years experience in toxicological assessment of e-liquids flavors allowed us to develop innovative approach to predictive toxicology to develop safer products”

COMPLIANCE

Compliance draws the boundaries in which science and innovation can act: TRUSTiCERT is the guide to proceed safely within the borders of the rules.

“We are professionals of regulatory affairs, providing our customers comprehensive assistance for EU and US. We support compliance at 360”*

INNOVATION

Innovation determines corporate competitiveness and is essential to emerge and excel in a modern and globalized economy.

“We provide our customers with our resources and links in national and international research centers to offer support to improve products, production processes and design.”

TRUSTiCERT roots are in the University, where since 2012 the founders have been coordinating a team of researchers to study the scientific aspects relating to e-cig.

Today TRUSTiCERT is composed by six departments with as many Ph. D in strategic positions.

Thanks to several agreements with accredited laboratories, TRUSTiCERT benefits from the most advanced technologies to fully satisfy the requirements imposed by the legislation landscape.

TRUSTiCERT is an active player in the development of standards for e-cig and e-liquid, taking part in several Technical Commissions as a UNI member.
