

Formulation restrictions - Black List

List and groups of substances banned by TPD

- Vitamins or other additives with beneficial effects or with reduced health risks (Vitamins C, fatty acids Omega-3)
- Caffeine, taurine or other additives (theine or guaranà) e stimulants substances associated with greater energy and vitality
- Additives that have emissions coloring properties
- Additives with carcinogenic, mutagenic and reproductive toxic (CMR) properties
- Except for nicotine, the ingredients used in the e-liquids should not contain risks to human health in heated and unheated forms

The countries Germany, United Kingdom, Hungary and Netherlands, in addition to TPD prohibitions, published a list country-specific of prohibited substances and groups of substances.

Below the updated list.

National Restriction

Netherlands

The Dutch government wants to allow only tobacco-flavored e-cigarettes on the market, with the ultimate goal of banning all those sweet and fruity flavors that are in vogue mainly among the young and very young. Currently, **ONLY AND EXCLUSIVELY** the following substances are allowed.

INGREDIENTS	CAS
beta-Damascone	35044-68-9
(E)-beta-Damascone	23726-91-2
(Z)-beta-Damascone	23726-92-3
Damascenone	23696-85-7
(E)-beta- Damascenone	23726-93-4
Ketoisophorone	1125-21-9

2-Hydroxy-3,5,5- trimethyl-2- cyclohexenone	4883-60-7
3-Ethylpyridine	536-78-7
3-Acetylpyridine	350-03-8
2,6-Dimethoxyphenol	91-10-1
5-(Hydroxymethyl)- 2-furfural	67-47-0
alpha-Angelica lactone	591-12-8
Isovaleric acid	503-74-2
(-)-Caryophyllene oxide	1139-30-6
Ambroxide	3738-00-9
(3aR)-(+)-Sclareolide	564-20-5
