Product description Set of flavoured nicotine powder pouch.

Risk type Chemical

Risk description The product has an excessive concentration of nicotine (28.7 +/- 7.2 mg/kg). This can lead to the accidental consumption of a high dose of nicotine. Nicotine is acutely toxic and may pose a risk to the safety of the user, particularly if the product comes into contact with the skin or is ingested. The product also lacks the required labelling, child-resistant fastening and

tactile warnings. The user is therefore not adequately informed about the risks when using this product and a child can access the content which may be swallowed and cause chemical pneumonia, which may be fatal.

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product does not comply with the Regulation on the classification, labelling and packaging of substances and mixtures (CLP).
